# Wipeout

WIPE IT UP AND WASH IT OUT

Sorb-x Wipeout handles any general purpose job with ease and reduces germ growth. Impregnated with an anti-bacterial agent, it inhibits the growth of bacteria within the cloth and reduces the spread of pathogens.

These reusable wipers are available in a range of colours to enable users to create a colour coded system for hygiene control.

Bulky and absorbent, the cloths can be rinsed out easily and come in regular for everyday use or heavy duty for extra tough jobs.
