

RUBBERMAID 45.7 CM MICROFIBER DAMP ROOM MOP, BLUE

HYGEN™ Microfiber, with a proven track record, eliminates 99.7% or more of viruses and bacteria using only water*. Equipped with built-in scrubber technology, it reduces cross-transmission and lowers the risk of healthcare-associated infections. Its patented zig-zag design, made of polyester and polypropylene, enhances scrubbing power. Optimised face material construction balances drag force and cleaning efficacy for a seamless experience. Enduring up to 500 launderings per CDC guidelines in hot water (71.1°C) or 200 with chlorine bleach, it maintains effectiveness. Colour-coded edge tape promotes organised cleaning practices, reducing cross-contamination by assigning designated colours for different areas or tasks.

SPECIFICATIONS:

Compatible with
Rubbermaid 45.7cm
Quick Connect Frame
(FGQ56000YL00)

SOLD:
