

Everything you need to know about handling sanitary waste in New Zealand

Pod™ Petite is a revolutionary new concept that allows you to take control of your sanitary hygiene service requirements.

With our sanitary disposal system, you or your cleaners can easily and hygienically service with zero exposure to waste.

Save money • Save Time • Better hygiene

Ministry for the Environment Waste Classification

There is no specific legislation in New Zealand for the management and disposal of sanitary waste:

- Sanitary waste is classified as non-hazardous waste
- It is no more of a public health risk or concern than domestic or household waste
- Can be collected and disposed in municipal solid waste landfills

Health & Safety compliance with Pod™ Petite Wipes

Antimicrobial cleaning and odour control wipes designed specifically for Pod™ Petite.

- Clean, sanitise and deodorise inside and out
- Protect your staff and customers from harmful bacteria that thrive in this environment.
- Easy to use : One wipe = one dose

For more information, please see over page →

Independent assessment from Safetycare NZ Limited

We have done an independent assessment on the management and disposal of sanitary waste here in New Zealand and any risks to users of the Pod™ Petite system.

We looked at guidelines from the Ministry of Health, Ministry for the Environment, Worksafe NZ and Regional/City Council waste management requirements.

It is clear that sanitary waste (e.g. feminine sanitary pads/tampons) collected from the general public is permissible in general waste to landfill. It is not classified as hazardous waste.

Business's using the Pod™ Petite system together with Pod™ Petite Wipe sanitiser technology can simply dispose of this waste responsibly in their landfill bins and without contact with contents.

Tony Walton
Director

Pod™ Petite – a powerful solution for a delicate problem

- 1 Dual action – cleans, sanitises, deodorises

- 2 Wipe outside surfaces on Pod™ Petite

- 3 Drop wipe inside the unit for complete protection

How Pod™ Petite Wipes work

- Cleans and eliminates harmful bacteria on the outer surfaces
- Vapour phase technology from natural essential oils are slowly released from the wipes and permeate throughout the unit even when it is full
- Deodorises, sanitises and prevents the formation of malodour inside the unit
- Eradicates bad odours and avoids incurring costs for early exchange due to customer complaints
- Tested in actual sanitary units, providing proven verification and validation for its efficacy.
- 1 wipe per unit - simple dosing system protects for 14 days
- Fresh, clean scent permeates throughout the Pod™ Petite, producing a pleasant washroom aroma

Pod™ Petite – a powerful solution for a delicate problem

Product range

Pod™ Petite Wipes – Bubbly Fragrance
SKU# 33333
150 Sheets/Roll
12 Rolls/Cartron

Sustainably sound

- Provides optimal performance with minimal impact on the environment through the use of non-toxic, natural plant sources
- Resealable pouch minimises packaging waste
- Easy to use with minimal training and PPE requirements
- Economical with no risk of cost overruns through product overdosing
- NZFSA approved
